

AdvanLED Street Light Series

AdvanLED Street light is designed to replace existing HPS or Metal Halide Street lamp. It is built by using the good heat dissipation materials to ensure long term reliability and the best performance. It is also designed in modular form and using lightweight heat sinks, therefore lowering the production cost. Thus directly transfer the cost benefits to our customer.

Features

- Save more than 50% energy
- Long life: >35,000 operating hours
- Light up instantaneously
- Low pollution imprint to the environment
- Low operating temperature, less than 60°C
- IP 65 compliance
- Intelligent and precise current source to prevent overdrive
