

AdvanLED Downlight Series

AdvanLED DownLight is designed to replace conventional Down Light such as compact fluorescent lamp (CFL) and Halogen down light. It is designed such a way that the light output and colour quality are similar, or even better compared to conventional types while consuming less power, dissipating less heat and environmental friendly. Besides proven to be 50% more energy saving.

AdvanLED DownLight Series is available in two size options, 4 inch and 6 inch to suit your personal indoor application.

Features

- SMT Technology ensures the operations of > 35,000 hours
- Enhanced heat sink technology ensures lower operating temperature
- Zero warm up time
- Mercury and lead free (environmental friendly)
